A Report on

Online Android Project Exhibition

2020-2021

Organized by,

DEPARTMENT OF COMPUTER SCIENCE &

ENGINEERING in Association with

Android Club

The Department of Computer Science and Engineering started an Android Club during academic year 2019-20 to encourage the students to acquire the knowledge in Android Technology.

The objective of the club is as follows:

1. To create awareness about android technology among students.
2. To solve social problems using Android Technology.
3. To learn and gain detailed knowledge about android and other new technologies required for mobile application development.
4. To share knowledge with students and faculties.

Faculty Coordinator:

1. **Mrs. Kavyashree E D, Asst. Prof ,Dept. of CSE**

<u>Events organized under android club as follows</u>

DATE: 3rd.August 2021   **Platform: MS Teams, 10 AM to 5 PM**

Total No. of Students participated: 111

Event on "Online Android Project Exhibition" aims to impart technical and practical knowledge to students and future engineers. Android project exhibition was scheduled on 3rd August 2021 at 10AM through MS teams. The students had to exhibit their technical as well as presentation skills wherein they were given an opportunity to demonstrate their project through online.

Computer Science Department faculties were assigned as departmental coordinators for the online android project exhibition who helped student participants with the required details.

CSE – Dr. Gorabal, Mrs. Nasreen Fathima

The main agenda behind the online exhibition was to explore the technical skills among our students and give more exposure towards technical knowledge which is very much required in building their career. The event mainly focused in developing interest among students toward new innovation and rapidly growing technology.

The faculties also encouraged the students, which brought more zeal and enthusiasm among the students to work harder towards the success. Near about 40 teams participated in this event and each team came up with a unique project which clearly showed the technical ability of our students.

The judges not only gave the judgments but also helped and guided the students to make some improvisations in their project wherever required which in turn helped the students to work on their project in a better way.

Overall, the event turned out to be a very successful one since many teams participated and were satisfied with their efforts. This also gave them the confidence to work out more and more project models which would grace them with high technical knowledge and skills.

Best Project Award:

A T M E
College of Engineering
